

# INNOVATIVE ALUMINIUM SOLUTIONS

---

*Providing innovative aluminium solutions to the construction industry.*

---

Partitioning Supplies (NZ) Ltd, now known as PSL – Innovative Aluminium, specialises in providing innovative aluminium solutions to both the residential and commercial construction industries. We are constantly at the leading edge of the aluminium extrusion industry in New Zealand and our products are specified by some of the country's leading designers.

Unique to PSL – Innovative Aluminium is our patented Alement Plus range. Products in this suite are suitable for residential and commercial applications and provide a simple, clean way of achieving shadowlines in walls, around openings and ceilings. All products are installed by the carpentry trade and provide sharp edges for the plastering trade to work with to achieve the perfect negative detail every time. This suite has products that provide 12.5 mm x 12.5 mm to 100 x 12.5 mm shadowlines. Alement Plus extrusions can be powdercoated to match adjacent wall colours or anodised to match PSL's other partitioning products.
